Genetics Ch. 13

Bookmark File PDF Answers To Ch 13 Genetic Engineering Answers Free Ebook

Description. Humans normally have 46 chromosomes in each cell, divided into 23 pairs. Two copies of chromosome 13, one copy inherited from each parent, form one of the pairs. Chromosome 13 is made up of about 115 million DNA building blocks (base pairs) and represents between 3.5 and 4 percent of the total DNA in cells.
