Bootstrapping (compilers) - Wikipedia

Bootstrapping is a statistical technique that falls under the broader heading of resampling. This technique involves a relatively simple procedure but repeated so many times that it is heavily dependent upon computer calculations. Bootstrapping provides a method other than confidence intervals to estimate a population parameter.

By design Bootstrap 5 isn't a complete departure from v4. We wanted everyone to be able to more easily upgrade to this future version after hearing about the difficulties from the v3 to v4 upgrade path. We've kept the bulk of the build system in place (minus jQuery) for this reason, and we've also built on the existing grid system instead ...
