Busting myths: Cancer is not just one disease. September 26, 2018 | by CTCA. Some people can't fathom why researchers haven't figured out how to cure cancer yet. But what research has shown is that cancer is not just one disease but many, each with its own characteristics, risk factors, causes and treatments.

Busting myths: Cancer is not just one disease | CTCA

Cancer Is Not a Disease. When one thinks of cancer, there is an automatic association with disease, illness and sickness. This newsletter attempts to redefine what cancer really is. It is definitely not a disease in the classic sense and most definitely not an illness. An understanding of the true nature of cancer will hopefully lessen the stress and fear that a cancer patient, friends and family experience.

would have cancer epidemics just as we have flu epidemics - cancer would spread like measles, polio, or the common cold.

Is Cancer Contagious? - American Cancer Society

There are many types of cancer. It's not just one disease. Cancer can start in the lungs, the breast, the colon, or even in the blood. Cancers are alike in some ways, but they are different in the ways they grow and spread.

What Is Cancer?

Cancer is the name given to a collection of related diseases. In all types of cancer, some of the body's cells begin to divide without stopping and spread into surrounding tissues. Cancer can start almost anywhere in the human body, which is made up of trillions of cells. Normally, human cells grow and divide to form new cells as the body needs them.

Cancer Is Not a Disease - It's a Healing Mechanism by ...

Because there is money to be made by people peddling the lie that cancer is not a disease. If you choose a specific and imaginative definition, you can argue that cancer does not fit the parameters and is, therefore, not a disease. Alternatively, you can look at the definition on Wikipedia:

Why is cancer not a disease? - Quora

"In industrialized societies, cancer is second only to cardiovascular disease as a cause of death. But in ancient times, it was extremely rare. There is nothing in the natural environment that can cause cancer. So it has to be a man-made disease, down to pollution and changes to our diet and lifestyle.
