Case Studies In Global Health

Case Studies for Global Health is a collection of case studies that examine and illustrate how people, organizations, companies and governments have worked together to try to solve a global health challenge. Thirty-three case studies were published in 2009. Fifteen of them have been updated here. Another 13 new case studies are also presented here. These studies describe existing or planned collaborative relationships, projects and transactions among a broad global health community.

Case Studies for Global Health

This series of twenty case studies illustrates real-life proven, large-scale success stories in global public health. Drawing from a rich evidence base, the accessible case write-ups highlight experiences in scale-up of health technologies, strengthening of health systems, and the use of health education and policy change to achieve impressive reductions in disease and disability, even in the poorest countries.
