TSDE (your profit) So, when we say that a business was sold for a multiple of 2.44X, for example, it means that the amount paid for the business is a value of 2.44 times the profit. For example, a business that is doing \$300,000 in profit per year sold for at 2.44X would have a sale price of \$732,000 ($\$300,000 \times 2.44 = \$732,000$).

What's Your Business Worth? | Business Valuation Calculator

A business valuation calculator helps buyers and sellers determine a rough estimate of a business's value. Two of the most common business valuation formulas begin with either annual sales or annual profits (also known as seller discretionary earnings), multiplied by an industry multiple. Both methods are great starting points to accurately value your business.
