Aspen HYSYS® Dynamics is dynamic process simulation software that has been integrated into Aspen HYSYS, making it easy to convert your steady state process model into a dynamic process simulation model to study time-dependent oil & gas processes, including gas processing and petroleum refining.

Process Dynamics

Consider the simple “bath tub” example •

Steady-state: $F_i = F_o$

• Dynamic: $dV/dt = F_i - F_o$ where $V = V_{init}$ @ $t=0$
 $V = H * A$ $F_o = k * H$

• Dynamic simulation predicts how a process and its associated control system will
