The EVAP emissions control canister is located on the driver side, near the rear tires. Jack up the vehicle from the recommended jack placement and place the rear of the vehicle on jack stands for support. Make sure to keep pressure on the jack after lowering the vehicle onto the jack stands for extra safety.

the centerpiece of the evaporative emission control (EVAP) system, a technology designed to prevent vapors from your fuel tank from escaping into the atmosphere.. The charcoal canister seldom fails and should last the life of the car. In most cases, EVAP system problems are not caused by the canister itself but by related valves.
