Qrp Z Match Tuner 40

The QRPGuys Multi-Tuner is a Z-match design that will match a wide range of coax fed, long wire, and balanced line antennas, like high-impedance, low-loss UHF twinlead or ladder line for 40m-10m. The Multi-Z tuner is based on a design by Charlie Lofgren, W6JJZ.

Tuners - QRPGuys

While tuned up on 40 meters, I had a quick QSO with a station near Chicago from here in southeastern Pennsylvania with 3 watts. Wrap-Up. This little Z-Match tuner was one of my favorite—and most useful—projects. It's a

The little Z-match
loaded up the
downspout on 40
through 10 meters with
no problems. On most
bands, I could get the
LED indicator to go
completely out. On one

Online Library Qrp Z Match Tuner 40 10m G8ode

or two bands, I couldn't get it completely extinguished but it did give a definite null. Double-checking with a second SWR bridge indicated that the SWR was 1.5:1 or less in this condition.

A Homebrew Z-Match Tuner

While browsing around for QRP tuners, the Z-Match caught my attention. The Z-match network was originally

Online Library Qrp Z Match Tuner 40 10m G8ode

described by R. W. Johnson, W6MUR in the July 1954 edition of the QST magazine published by the ARRL. It met my requirements stated above and it was a proven tuner network.
