### Renko Bar Trading System

After many years of day trading tick bar charts, the decision to switch to day trading Renko charts was based on the clarity of the Renko bricks fixed price moves -vs- the irregular and random size of tick bars. Additionally, besides the Renko charts method being simpler to trade than tick bar charts, it has also been clearer to teach other traders.

What Is Renko Charting. Renko trading is not as popular and not as well known as normal candlestick or bar chart. Renko chart, developed by the Japanese, is a graphical display that only involves the price movement, as the time and volume are not included. The construction of a Renko chart is simple: a brick (the "body" of a Renko bar) is formed in the next column once the price exceeds the top or bottom of the previous brick by a predefined amount.
