Hi. We are planning to upgrade SAP from 4.x to ECC 6.x. Request if anyone has a detailed step-by-step guide of how to go about with the upgrade, specially from an ABAPer's and basis perspective, to share it. Any help would be appreciated. Thanks in a

SAP Upgrade Guide - SAP Q&A
When you are running SAP HANA 2.0 SPS 05 (revision 50, that is) and you install revision 51 this is considered as an update. New features are introduced with support package stacks (SPS). To enjoy the new capabilities, you will need to upgrade, for example from SAP HANA 2.0 SPS 04 to the latest SPS 05 release. Technically, this is the same as an update as we are going from one revision to the next but as we now activate new functionality a bit more planning and testing comes into play.

Upgrading SAP Identity Management from 7.2 to 8.0 This document describes how you upgrade a production system with the provisioning framework for SAP systems from SAP Identity Management 7.2 to 8.0. If you are currently running version 7.1, you need to upgrade first to 7.2 and then to 8.0, but you can do that in the same upgrade project without running live on 7.2.
