### **Drain : The situation - Part 2**

- A “slow drain” device is a device that delays returning B2B credits (R\_RDYs)
- FC switch quickly reaches 0 Tx credits remaining and is unable to send
- This causes data to build up in the FC switch
- FC switch then must withhold R\_RDYs from adjacent end device or FC switch.

If you do not have a Zip-it tool, or if the tool was not able to clear out all debris, another option is to remove the pop-up and clean it out. Most pop-ups are held in place with a nut attached to the drain just under the sink. To remove the pop-up reach behind the drain pipe under the sink to find the pop-up nut.

## Detection **Slow Sink Drain - The Spruce**

One natural solution that will get some slow drains unclogged is boiling water. If the water is still standing in your shower, let it drain out. Boil some water, and then slowly pour it down the drain, which will help move some minor blockages along. If you have regular PVC pipes, boiling water could damage the pipes.
