It would appear that each research team in the field of unraveling DNA speaks its own language. What makes the comparison with the tower of Babel more apt is that DNAology sounds like another secular religion. Many of the body's ills previously attributed to God are now being attributed to faulty DNA.

Praise for Unraveling DNA This brilliant book differs from all other accounts of the new biology that I know. It intertwines the history of discovery related to DNA with a clear account of the logic of those discoveries and of the problems yet to be solved. Yet anybody can understand it: it reads like a detective story.

In short, the most dramatic achievement to date of the \$3 billion Human Genome Project is the refutation of its own scientific rationale. In 1990, James Watson described the Human Genome Project as "the ultimate description of life". It will yield, he claimed, the information "that determines if you have life as a fly, a carrot, or a man."
